

Corporate Compliance

An effective compliance program yields:

- ✓ Improved documentation and coding practices
- ✓ Improved charge capture processes
- ✓ Improved communication and internal controls

At CCI, we specialize in assisting our clients transform a compliance plan document into an operations improvement process!

Compliance Plan Development & Review

- ⇒ Our goal is to create a plan document that can be readily understood and implemented by your team. The plan document lays the groundwork for the operational aspects that yield the greatest benefit to your Organization.

Risk Assessment & Work Plan Development

- ⇒ Understanding your highest risk areas is an essential step to improved compliance. We can objectively facilitate a risk assessment with your compliance committee, allowing your team to focus its resources on the greatest opportunity areas. We will then collaboratively develop the annual work plan to implement process improvements.

Compliance Education

- ⇒ Education is a key component to effective implementation. We facilitate compliance education for all members of your Organization, including physicians, clinicians, coding/billing staff, and Board members.

Evaluating Compliance Effectiveness

- ⇒ How effective is your compliance program? How do you measure compliance effectiveness? This is where the “rubber meets the road,” and we learn about specific opportunities to improve operational performance.
